Ladder Assembly
Here, HuckBolts ensure the frame performs as a single, one-piece unit. This built-in strength provided by the fasteners greatly reduce maintenance and extend the life of the truck.

Magnalok
Top Rail
The solid circle-lock feature of the Magna-Lok ensures quick and sure installation, while its moisture and vibration resistant characteristics help guarantee the joint will stay put for the life of the trailer.

Hucktainer
Metal-Clad Panels
The Hucktainer swagged lockbolt contributes a high degree of strength and vibration-resistance, whether used with sheet metal, fiberglass reinforced plywood, or metal-clad panels.

BobTail
Grain Chute
The stainless steel BobTail with polished head works hard to keep chute seams tight, eliminating lost product.

BobTail
Chassis/Subframe Assembly
Designed to never loosen, proven BobTail HuckBolts provide both high structural strength and industry leading durability for critical subframe-to-chassis assemblies.

Auto-Bulb
Trailer Joints
The stainless steel Auto-Bulb offers critical corrosion-resistance, designed to withstand frequent acid washing. Its superior blind side bulbing action makes it ideal for installation within thin materials, oversized, misaligned, or slotted holes.

BOM
Ladder Attachment
The Huck BOM’s combination of high shear capacity and tensile force ensures the long-term integrity of this critical joint.

FloorTight
Floor
The proprietary FloorTight blind rivet provides superior strength and vibration resistance, adding to the life and durability of the trailer floor.

BobTail
Cross Members
Cross members provide significant structural support, and when fastened with the Huck BobTail, you can be sure the support will be as strong as possible. BobTail’s high structural strength and proven durability will help lead to many years of service for your trailer.

BobTail
Cross Members
The security of the truck/trailer connection is highly dependent upon the integrity of the fasteners that connect the two. Vibration-resistant Huck fasteners act as permanent components, making the fifth wheel an extension of the frame itself.

Air Bag and Shock Mounts
Providing the necessary shock and impact absorption so critical to trucks traveling over hazardous roadways, shocks and airbags mounted with HuckBolts deliver a much higher level of impact resistance.

Suspension Members
It would only take one loose fastener to lead to a cracked suspension hanger alignment problem or worse. In this critical application, HuckBolts provide strong, durable joints that in turn provide peace of mind.
