

Drilling Technology

American made **RMT drill bits** from **Applifast** must be tried to be believed. These drill bits are engineered to require less torque and lighten operator loads like none other! Available in fractional, letter and number sizes.

RMT drill bits from **Applifast** are manufactured with proprietary drill grinding cells transforming solid high-speed steel blanks into finished drill bits without leaving the cell. Using revolutionary rotary methodology, a drill blank is oriented once then moves through each manufacturing phase in a precise computer controlled operation. This process innovation ensures the highest degree of repeatable quality manufacturing in the industry.

RMT BITS FROM APPLIFAST ARE A SECRET FROM THE AEROSPACE INDUSTRY THAT WE'RE PLEASED TO SHARE WITH YOU. ADVANCEMENTS THROUGH TECHNOLOGY AND PROCESS HAVE PLACED RMT DRILL BITS FROM APPLIFAST AS THE LEADER IN QUALITY DRILL BIT MANUFACTURING.

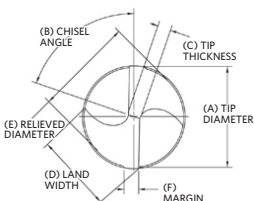

- FEATURES:**
- Heavy taper with narrow tip for quick starts without sacrificing the structure
 - Tri-flat shank on drill bits 3/16" through 1/2"
 - Engineered for less torque and lightens operator load
 - Industrial-Grade NAS High Speed Steel (HSS)
 - Aggressive web taper prevents breakage
 - Shorter, stronger cutting lip for easier drilling and longer life
 - 137° split point penetrates surface on contact and prevents drill bit 'walking'
