Experience the efficiency of AirPower riveting

- ✓ The **multi-functional trigger** has low action for hours of comfortable use with one or two fingers.
- ✓ The integral **mandrel collection system** holds the rivet in the nose piece even when working 'face-down'.
- ✓ A **360° revolving air inlet** accommodates right or left handed users and can be rotated to access tight fastening locations in any position.
- ✓ A **composite body** reduces the weight of the tool and also prevents scratching to assembly materials.

Multi-functional trigger controls the suction. When the trigger is pressed and shifted up, the suction is deactivated, when pressed and shifted down the suction is activated.

Designed with ergonomics in mind to increase endurance and personal comfort on the production line.

Composite body to eliminate scratching and marring of material surfaces.

Articulating swivel air hose saves air consumption with inline shut-off slide valve.

360° rotating air inlet enables a right handed or left handed operator to rivet in any position.

Multi-functional mandrel collector is a simple and effective system for maintaining a safe and tidy production area.

* PRN nose tips are available in 1/8", 3/16" and extended 1/8".

Tool suction holds a rivet in the tool while positioning even in face-down applications.

Tool hanger allows the riveter to be suspended from a tool balancer.
