

# Marson® BT-8

## Portable and Reliable Battery Powered Installation Tool For Threaded Inserts

- ✓ Lightweight
- ✓ Ergonomic Grip
- ✓ Superior Balance
- ✓ LED Work Light
- ✓ Extended-Life Battery
- ✓ Portable

The Marson® BT-8 is a battery-powered rivet nut installation tool designed to deliver reliable pull-force for high-volume assembly applications. It is engineered for versatility and extensive use on factory floors and job sites.

It is designed with the operator in mind as there are many ergonomic features including a comfort grip and a LED work light.

This high performance threaded insert tool is a portable powerhouse and offers exceptional value.

Marson's durable, portable, and lightweight industrial installation tool makes installing threaded inserts easy and effective.

The tool kit includes one tool with battery, a battery charger, noses, and two wrenches all conveniently stored in a durable carrying case.
