

Dry Skin?

Stokolan Classic Enriched Skin Conditioning Cream

- ✓ High Lipid Content
- ✓ 100% Silicone-Free
- ✓ Excellent Skin Compatibility
- ✓ Non-Greasy Formula
- ✓ Gender Neutral Fragrance

Occupational skin irritation, frequent washing or the harsh climates we live in can lead to dry, rough or chapped skin which often results in reddening, scaling and even bleeding. This loss of moisture and oils leads to brittleness of the outer layer of skin. Consequently, the skin loses its natural protective function and becomes more susceptible to harmful substances in the workplace. Stokolan Classic is a highly concentrated skin care cream which adds moisture and oil to the skin, thereby assisting in the natural regeneration of the skin.

Stokolan Classic from Applifast has proven very effective in helping to prevent and treat dry, rough and even cracked skin caused by work-related conditions (attrition dermatitis) or simply being exposed to cold and/or dry weather conditions. Stokolan Classic is a silicone-free skin care cream that spreads easily, works quickly into the skin and leaves no residual "greasy" feeling. Stokolan Classic is ideal for use in any workplace setting including both industrial and office environments.

STOKOLAN, WHEN APPLIED REGULARLY, WILL KEEP SKIN SOFT AND SMOOTH AND PREVENT SKIN FROM BECOMING CHAPPED OR DRY WHICH IS A CONDITION THAT COULD INDICATE THE ONSET OF OCCUPATIONAL SKIN DISEASE.
