

# Truck & Trailer

## Build it Right Service it Right

Fasteners and rivets from Applifast deliver the industry's best combination of clamp, shear, and tensile strength. This results in high vibration resistance and zero maintenance.

**Applifast Assurance** ensures you get the best solution, products, and results.

### C6L®/C98LT - The Original HuckBolt®

- ✓ One of the industry's most popular fastening systems.
- ✓ Stronger, easier-to-install, and more durable than welding, adhesives, or conventional threaded fastening systems.
- ✓ Exclusive locking 6-groove design and high uniform clamp force ensures a secure, permanent fit.
- ✓ Strong, vibration-resistant seal.

**Available Sizes:** 3/16", 1/4", 5/16", 3/8"  
**Materials:** Steel, Aluminum, Stainless Steel  
**Head Styles:** Round, Truss, C98LT Rivet

### Magna-Grip®

- ✓ For applications where a wide grip range is required and a flush bolt break to the collar is beneficial.
- ✓ Highest level of vibration-resistance possible.
- ✓ Installs reliably, and consistently provides high, uniform installed values.

**Available Sizes:** 3/16", 1/4", 5/16", 3/8"  
**Materials:** Steel, Aluminum, Steel with Stainless Steel Cap  
**Head Styles:** Button, Truss, Broad Truss, 90° Flush, 98T Rivet

### Magna-Lok®

- ✓ A versatile, hole-filling fastener that can be installed with conventional installation tools.
- ✓ Utilizes a unique circle-lock feature: a weather resistant connection and a simple visual inspection ensures it is installed properly 100% of the time.
- ✓ With a wide grip range and a wedge type pulling action, the Magna-Lok is the best gap-pulling fastener available.
- ✓ A secure joint that is vibration resistant.

**Available Sizes:** 3/16", 1/4", 3/8", 1/2"  
**Materials:** Steel, Aluminum, Stainless Steel  
**Head Styles:** Protruding, Truss, 100° Flush

### Magna-Bulb®

#### Thin Sheet Joint Materials

Unique bulbing fastener with high shear strength offers a broader bearing surface for high pull-out strength in materials and/or oversized holes. Mechanical pin-retention ensures structural integrity.

### Magna-Tite®

#### Thin or Low-Strength Materials

The Huck Magna-Tite is a structural rivet fastener that is well-suited for use in oversized holes and repair applications. Its wide, blind-side bulb makes it ideal for installation in thin or low-strength materials.

### Hucktainer®

#### Fiberglass Reinforced Plywood and Metal Panels

Hucktainer is a 2-piece specialty fastener. They install with a consistent pressure reducing the potential for crushing panels, have zinc plating that resists corrosion, can never be over-torqued or under-torqued, and are tamper resistant.

### BOM®

#### Ladder Attachment

The Huck BOM's combination of high shear capacity and tensile force ensures the long-term integrity of this critical joint. It is the highest strength blind fastener in the world.

### BobTail®

#### Chassis/Subframe Assembly

Designed to never loosen, proven BobTail HuckBolts provide both high structural strength and industry leading durability for critical subframe-to-chassis assemblies.

### Auto-Bulb®

#### Trailer Joints

The stainless steel Auto-Bulb offers critical corrosion-resistance designed to withstand frequent acid washing. Its superior blind side bulbing action makes it ideal for installation within thin materials and oversized, misaligned, or slotted holes.

### Magna-Lok®

#### Top Rail

The solid circle-lock feature of the Magna-Lok ensures quick and sure installation, while its moisture and vibration resistant characteristics help guarantee the joint will stay put for the life of the trailer.

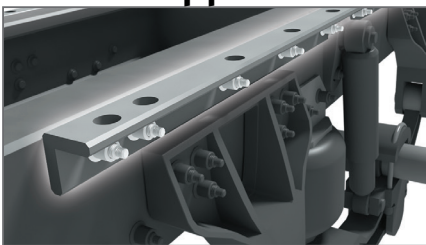

### HuckLok®

#### Secure Hold

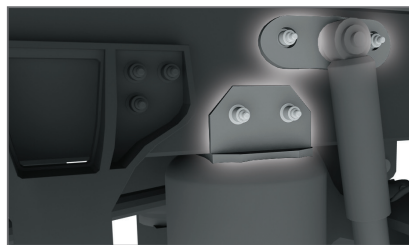

The HuckLok blind rivet combines high shear strength and high pull-force. Its double-locking action consistently secures the assembly from both sides resulting in maximum hold and joint integrity.

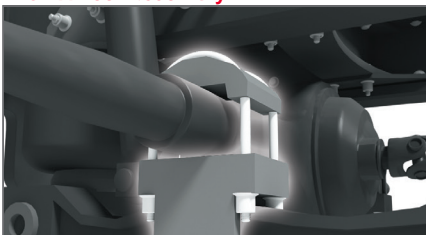

## Critical Applications

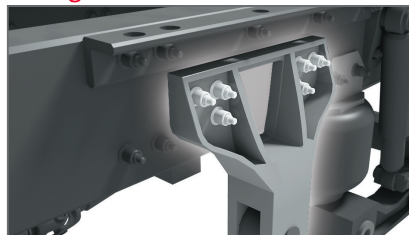

Fifth Wheel Assembly

Air Bag and Shock Mounts

Axle Connection

Suspension Members

- ✓ High Clamp Strength
- ✓ Cost-Effective
- ✓ Vibration Resistance
- ✓ Longer Life

HuckBolts® contribute to the overall durability, strength, and performance of the truck and trailer.
